Becoming a Ethical Hacker

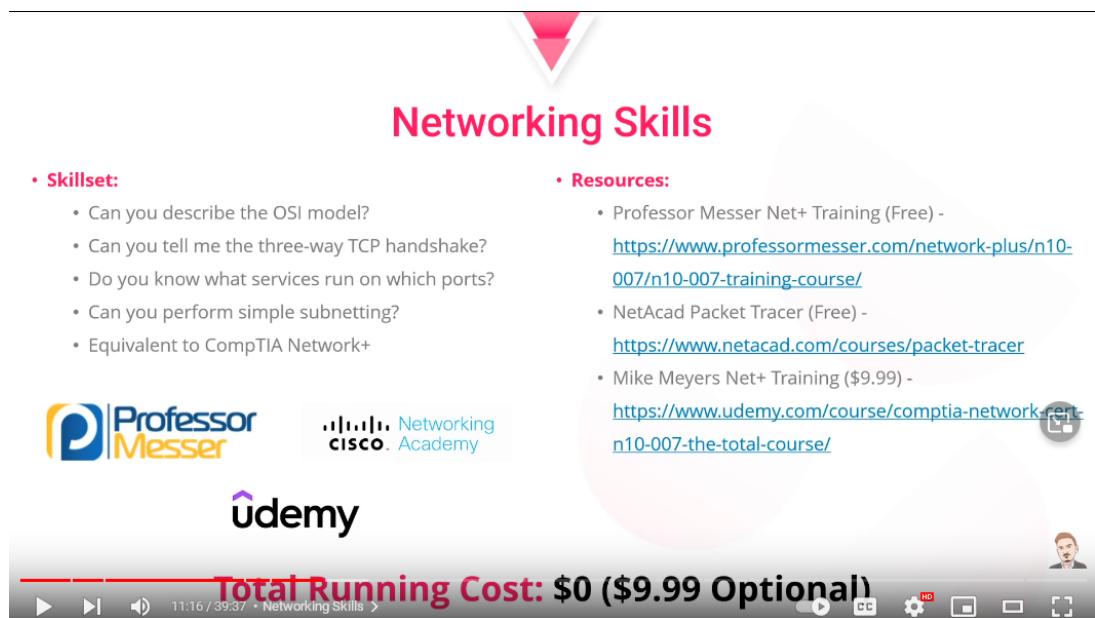

- Its important to build a foundation. If you do not you will find as you progress that you are lost more and more, which will lead to frustration, embarrassment from your peers and potentially you giving up. This is **not** what we want.
 - Dont go for the top of the pyramid of knowledge, start at the bottom and build strong

Building strong Cyber/Hacking/IT Skills

Above and Beyond Skills

- Skillsets

- Strong Desire to learn
 - Ever changing tools and attacks
- Non-complacency
 - Mitigate risks of being weeded out and left behind
- Social/People Skills
 - Often is about who you know, more than what you know
- Perseverance
 - It will be challenging. Learn to get knocked down and get back up again.
- Blog\Twitter\Gits\Etc
 - Put yourself out there, add to the community, share processes, show you have the skills and can communicate them well.
 - Put your labs on your resume and on social media

- Run your own race
 - Dont be concerned with how fast someone else is moving or how slow it might seem you are. Move at your pace and stay consistent.
 - Comparison is the **thief** of success. Comparing yourself to others will rob you of your own victories.
